EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Charles Rodman on 10/31/06.

2. The application has been amended as follows:

Claim 27 has been deleted.

3. The following is an examiner's statement of reasons for allowance:

Claim 23 recites a method for improving precision in counting particles. The method includes the steps of delivering a sheath stream at a first flow rate to a particle counting means such that one cell at a time is delivered to the counting means, making an initial particle count at the first flow rate, comparing the initial count to a reference value, and then adjusting the flow rate to a second rate based on the comparison. The Examiner considers Bezanson to be the closest prior art. Bezanson teaches generally controlling the flow rates to a flow cell.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1743

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
